WHAT DOES A COMMERCIAL PROJECT DEMAND?

Compliance & Standards

Commercial projects must align with national building codes and industry regulations to ensure safety, accessibility, and long-term performance.

- National Construction Code (NCC) – sets out structural, fire, and accessibility standards for all commercial facilities.
- Work Health & Safety (WHS) Regulations – require safe, low-risk environments that protect staff and visitors.
- Building Code of Australia (BCA) – defines material and installation standards for durability, hygiene, and compliance across sectors..

Aesthetics & Brand Experience

Design reflects brand identity and user experience. Finishes, colour palettes, and textures set the tone for how people interact with a space—professional, inviting, and cohesive. Durable materials should enhance that visual language without sacrificing practicality or compliance.

Hygiene & Maintenance

Commercial amenities see relentless traffic and cleaning cycles. Surfaces must resist wear, moisture, and chemicals while remaining easy to maintain. Compact laminate systems deliver cleanability and endurance that keep facilities looking fresh, safe, and fit for purpose.

ENDURING DESIGN FOR DEMANDING COMMERCIAL ENVIRONMENTS

In commercial environments, performance, presentation, and reliability aren't optional — they're expected. From offices and retail centres to public facilities and transport hubs, DuraCube's Bathroom Joinery Systems are designed to deliver long-lasting function and style under constant use.

With 200,000+ systems delivered, DuraCube is trusted by leading builders, architects, and facility managers across Australia. Our wide collection of colours and finishes allows seamless coordination across different spaces — ensuring every design reflects your brand identity and project vision.

Our products are curated to be your one-stop shop for all bathroom joinery needs, offering cohesive, high-performance systems that simplify specification and installation.

Every system is precision-manufactured, tested, and installed for durability, hygiene, and visual consistency — all backed by a 15-year warranty on both products and installation.

FIRST FOR SOLUTIONS

DURACUBE SOLUTIONS: COMMERCIAL SECTOR

DuraCube delivers a complete range of systems designed to meet the performance and design demands of modern commercial environments.

LOCKER SYSTEMS

Built for staff amenities, end-of-trip facilities, and more our lockers combine security, longevity, and easy maintenance. Compact laminate construction resists moisture, impact, and graffiti, while options such as ventilation slots, integrated seating, and digital locks enhance practicality and design alignment.

PARTITIONS

Built for high-moisture environments, our toilet and shower partitions combine privacy, durability, and hygiene. Manufactured from compact laminate, they resist water, impact, and wear while maintaining a modern, streamlined look.

BENCH SEATING

Strong, versatile, and practical, our bench seating is designed to support both team and individual use. Available in island, wall-mounted with shelving, or wall-mounted with coat rail configurations, they deliver comfort and durability.

DURACUBE SOLUTIONS: EDUCATION SECTOR

DuraCube delivers a complete range of systems designed to meet the performance and design demands of modern commercial environments.

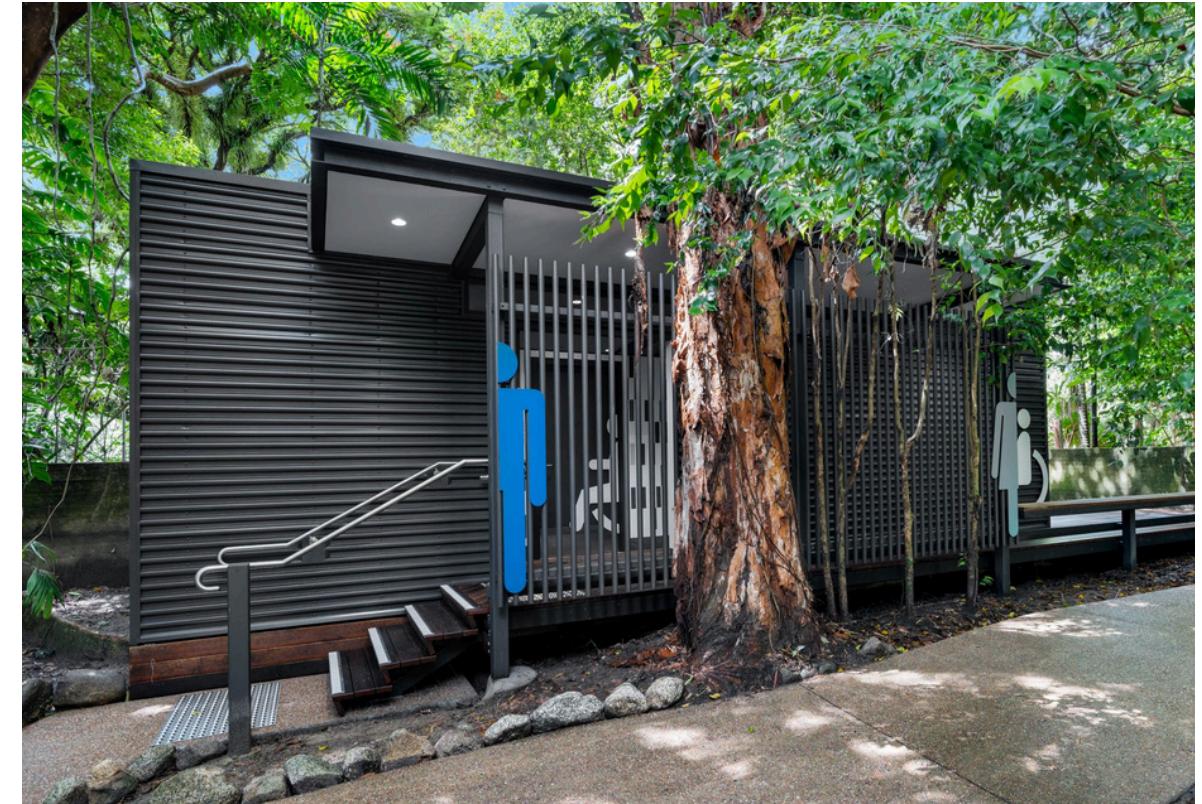

PRIVACY PANELS

Flexible and discreet, our privacy panels create defined spaces within bathrooms. Compact laminate construction ensures water resistance, durability, and easy maintenance, with customisable sizes adding to the privacy and comfortability of users.

VANITIES

Available as sleek vanity benches or with storage cabinets, our vanities are pre-cut for precise installation. Manufactured from compact laminate, they offer water resistance, easy cleaning, and a seamless professional finish with modular assembly.

CUT TO SIZE

DuraCube's bespoke cut-to-size service offers stylish, durable, antibacterial and antiviral surfaces for dining, working, or learning. We cut from 3600 x 1800 sheets to create tabletops, benchtops, door panels, wall panels, and other custom joinery.

INSIGHTS FROM OUR WHITEPAPER AND JOURNAL

Beyond the Commute

End-of-trip facilities are no longer an afterthought — they're a key feature of modern workplaces. This whitepaper explores how thoughtful design can support staff wellbeing, encourage sustainable transport, and optimise limited floor space. It covers layout planning, material selection, and compliance considerations for creating durable, low-maintenance facilities that enhance the everyday user experience.

Designing Functional and Compliant Commercial Bathrooms with the Right Toilet Partitions

The right partition system directly impacts privacy, accessibility, and hygiene across commercial spaces. This guide outlines how to specify partitions that meet building codes, perform in high-traffic environments, and align with your project's design vision. It includes practical insights into materials, configurations, and long-term maintenance to ensure every installation delivers both performance and visual consistency.

CASE STUDIES

95 GRENFELL STREET

Located in the heart of Adelaide's CBD, 95 Grenfell Street is a premium-grade office tower featuring 21 levels of contemporary workspace. Its recent refurbishment introduced a state-of-the-art End-of-Trip (EOT) facility designed to promote active commuting and enhance tenant experience.

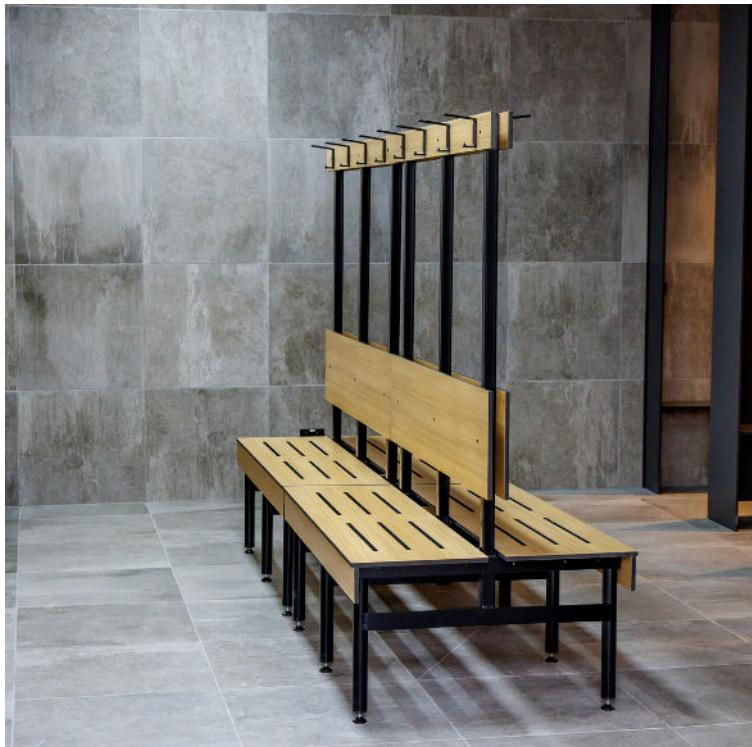

"The client aimed to enhance their existing EOT facilities by incorporating amenities for both male and female users," explains Megan Roper, Interior Designer at MPH Architects. The upgrade included additional lockers, basins, and showers, creating a sophisticated, high-performance space that encourages healthier lifestyles and supports long-term tenant retention.

NO.1 MARTIN PLACE

In 2024, No.1 Martin Place—one of Sydney's most iconic commercial addresses—redefined workplace luxury with a new benchmark in End-of-Trip (EOT) facilities. Surrounded by leading enterprises and high-end retail, the upgraded amenity delivers a smooth transition from commute to office while embodying Charter Hall's commitment to sustainability and tenant wellbeing.

Designed to go beyond function, the EOT experience offers elegance and practicality through durable finishes, seamless layouts, and a focus on comfort. The result is a space that elevates daily routines and reinforces the prestige of this landmark building.

MELBOURNE WALK - IHG HOTELS

Melbourne's first new street mall in over 50 years, Melbourne Walk brings new life to one of the city's most recognisable retail destinations. Located on a 3,600 m² site in the heart of the CBD, the project blends heritage restoration with contemporary architecture, creating a vibrant mixed-use precinct that celebrates the city's evolution.

Historic façades including the Diamond House, Public Benefit Bootery, Allans Building, and York Building were carefully restored to preserve Melbourne's character. A new skylit arcade connects hotel and retail zones, reflecting the city's laneway culture through a seamless dialogue between old and new.
