

FIRST NATIONS RANGE

Designed In Collaboration
With Blaklash

COPYRIGHT DISCLAIMER

The designs featured in our First Nations range are the result of a unique collaboration with Blaklash. These designs are central to the aesthetic and functional quality of our products and represent significant cultural heritage, storytelling, and intellectual property.

All designs are protected under copyright law and Indigenous Cultural Intellectual Property (ICIP) rights. They must not be reproduced, copied, adapted, or imitated in any form without the prior written consent of Blaklash. Any unauthorised use may constitute a breach of these rights and may result in legal action.

We respectfully acknowledge the cultural significance of these designs and ask that all parties honour and uphold the integrity of the designer, their communities and this collaboration.

INDIGENOUS CULTURAL INTELLECTUAL PROPERTY (ICIP) NOTICE

These designs are original work by Blaklash and incorporate traditional knowledge belonging to their community. Through best practice legal agreement, Blaklash has authorised the use of this artwork for approved applications.

Any use, reproduction, or dealing with this design beyond what has been expressly authorised by Blaklash is a serious breach of First Nations cultural protocols and customary laws. Such actions may also constitute a violation of the Copyright Act 1968 (Cth).

This is more than just a new product launch; it is the cornerstone of DuraCube's 2026 identity. We are evolving, moving beyond our history to become a purpose-driven design collaborator.

By anchoring our annual launch around the First Nations Range, we are signalling that cultural collaboration is not a side initiative but a central pillar of our brand direction.

The Goal: Cultural Integrity in the Built Environment

Our mission is to deliver a collaborative product launch that honours the position of DuraCube as a recognised leader in purpose-driven design within the Australian built environment.

This is not a conventional product release—it is an invitation for the architecture and design community to engage with First Nations storytelling through specification.

A NEW NARRATIVE: THE PURPOSE BEHIND THE PATTERN

A NEW NARRATIVE: THE PURPOSE BEHIND THE PATTERN

Strategic Impact & Inclusion

Prioritise Narrative over Aesthetic

We provide a medium for First Nations storytelling within the built environment.

Investing in the Future (The Clontarf Foundation)

Our collaboration with the Clontarf Foundation is a commitment to the next generation. Through this partnership, 10% of every specification of the First Nations range contributes directly to the education, discipline, and self-esteem of young Aboriginal and Torres Strait Islander men, driving long-term community resilience.

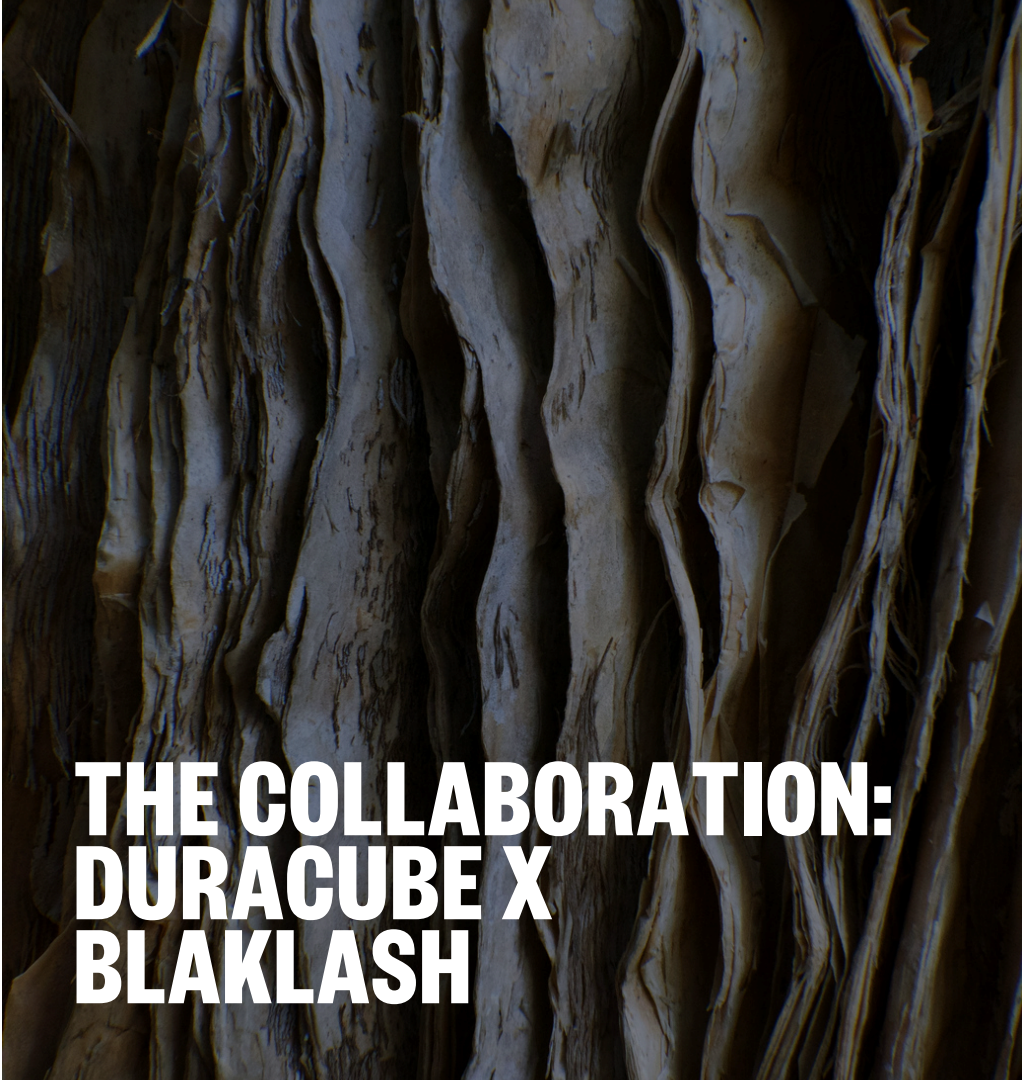

Empowering Social Procurement:

Choosing this range offers a tangible way for specifiers to support Indigenous design inclusion. We help bridge the gap between the built environment and government-mandated participation, ensuring that the economic benefits of major projects flow directly back into Indigenous design methodologies and community growth.

Our partnership with Blaklash was born from a shared necessity for greater cultural depth and narrative integrity within the Australian built environment. This is not a standard consultancy; it is a rigorous co-creation process rooted in Blaklash's extensive expertise in Aboriginal and Torres Strait Islander design methodologies.

The Blaklash Collaboration

As a 100% Aboriginal-owned creative agency, Blaklash specialises in bringing First Nations perspectives to the forefront of urban design and architecture. By anchoring our collection in their guidance, we ensure that our materials do not simply feature "patterns," but faithfully represent the profound relationship between water, Country, resilience, and renewal. This collaboration ensures that every design carries dual brand acknowledgment, signalling that First Nations expertise is a central pillar of DuraCube's 2026 brand direction.

THE COLLABORATION: DURACUBE X BLAKLASH

PURPOSE BEYOND DESIGN: THE CLONTARF FOUNDATION PARTNERSHIP

The Clontarf Foundation exists to improve the education, discipline, life skills, self-esteem, and employment prospects of young Aboriginal and Torres Strait Islander men and, by doing so, equips them to participate more meaningfully in society. Clontarf provides a proven, place-based solution. Through 162 school-based academies across six states and territories, we support around 12,000 boys every day. Their structured program combines sport, mentoring, long-term relationships and experiential learning to improve education, build life skills and support positive transitions into employment and further study.

Expanding Our Community Impact

The partnership between the Clontarf Foundation, DuraCube, and Blaklash brings together education, innovation, and culture to create meaningful opportunities for young Aboriginal and Torres Strait Islander men. Clontarf supports students through education, life skills, and employment pathways, while DuraCube delivers sustainable building solutions and Blaklash amplifies Indigenous voices through creative design. Together, we can create practical and culturally grounded opportunities that strengthen Indigenous communities, which are very exciting.

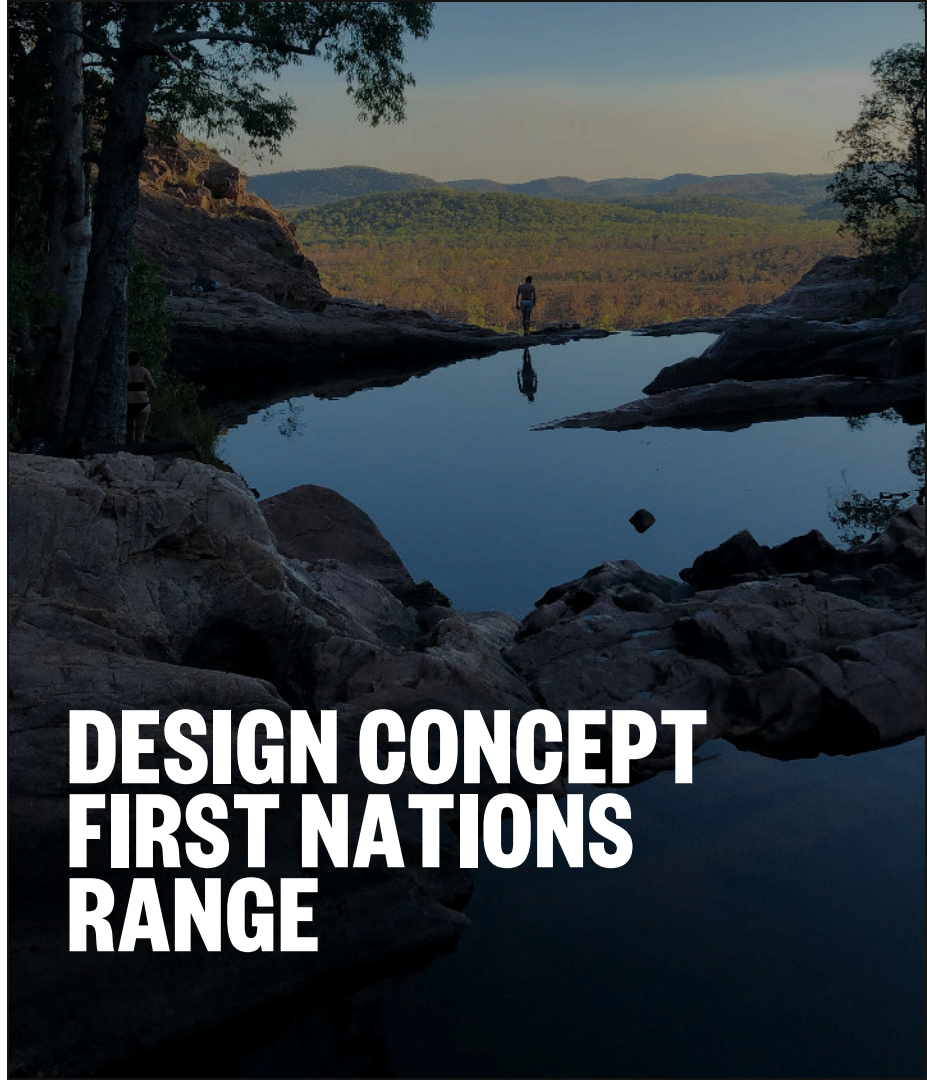

The First Nations Range is an invitation to engage with the enduring narrative of the Australian landscape through the medium of material specification.

Co-created with Blaklash, this range moves beyond the surface to explore the profound connection between Country, resilience, and the passage of time.

It is a collaborative response to the need for meaningful cultural representation within the built environment, shifting the role of the architect from a specifier of products to a participant in storytelling.

Living Histories celebrates the continuous sharing and perseverance of traditional knowledges, stories and traditions that sustain Country, culture and community. First Nations peoples understand time where past, present, and future exist in parallel, forming an interconnected continuum that challenges Western linear views of time. Under the "Living Histories" framework, three distinct collections—Tracks & Navigation, Cultural Practice, and Shifting Landscapes—unfold as a journey through texture and linework. From the rhythmic patterns of seasonal winds to the resilient textures of regrowth, each design is anchored in a specific cultural truth.

This range is not a static offering; it is a living bridge between ancient wisdom and modern infrastructure. By integrating these patterns into the daily workflow of design, we ensure that the "story travels with the specification". This range represents DuraCube's commitment to providing a tangible pathway for the industry to support Indigenous design methodologies and create a measurable community impact through the Clontarf Foundation.

DESIGN CONCEPT FIRST NATIONS RANGE

DESIGN CONCEPT FIRST NATIONS RANGE

The range features nine distinct patterns, each meticulously aligned to a curated colour palette. These palettes have been expertly selected to match the DuraCube stock range, ensuring that high-level design remains accessible and easy to integrate into any project.

The First Nations Range is divided into three core collections, each meant to explore a different facet of our shared environment:

Shifting Landscapes: An exploration of the constant evolution of the land—focusing on the rhythmic patterns of seasonal winds, the textures of erosion, and the powerful symbol of regrowth.

Tracks & Navigation: A study of movement and the deep knowledge required to traverse the Australian landscape, translating ancient paths into modern architectural linework.

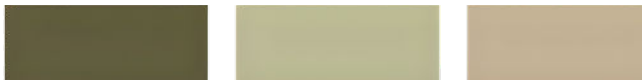

Cultural Practice: A collection that honours the physical manifestation of tradition, reflecting the techniques and ceremonies that have shaped the land for millennia.

THE FIRST LAUNCH - SHIFTING LANDSCAPES

SHIFTING LANDSCAPES

The Narrative: A Legacy of Observation

First Nations peoples hold a profound understanding of seasonal change, with each season marked by signs in Land, Water, and Sky Country. These natural indicators guide practices such as hunting, gathering, ceremony, and cultural burning, varying across regions to reflect diverse landscapes and ecosystems. These rhythms are imprinted in the fabric of these landscapes marking the passage of time.

Erosion from Water

Erosion reveals the passage of time through the ever-changing contours of the land, marking the deep connection between earth and water. Shaped by the constant rhythm of tides and erosion, they reflect the slow, powerful forces of Country at work. In design, rock pools can inspire forms and materials that reveal the quiet presence of nature's history.

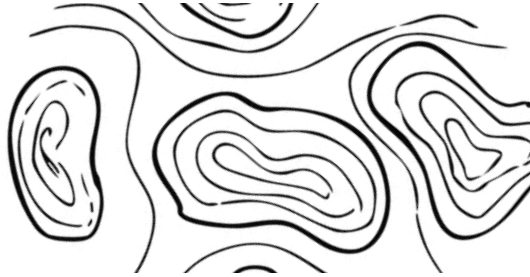

Regrowth

The land is shaped and reshaped through repeated cycles of regeneration. Over time, these rhythms layer histories of place and people into the landscape. The top layer represents visible growth, new life, ecological shifts and pushes the evolution of cultural practice, while the roots below reflect the foundations that sustain them. Together, these layers illustrate the ongoing cycle of renewal, where every new beginning is grounded in what came before.

Seasonal Winds

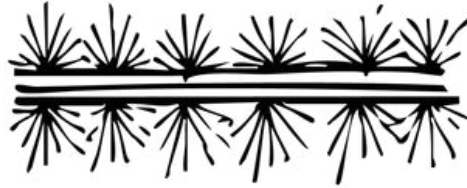

The patterns of the wind hold memory in the way they shape the land carving surfaces leaving traces of movement. These natural patterns carry the memory of seasons and the ongoing passage of time. Inspired by the energy of Country, this design reflects curves in dunes, the bends of trees, the etching of landscapes, a diary of movement and change. It captures the resilience of land constantly reshaped, celebrating the continual renewal of nature.

DESIGN INTENT & PATTERNS

Erosion

Erosion reveals the passage of time through the ever-changing contours of the land, marking the deep connection between earth and water. In design, rock pools can inspire forms and materials that reveal the quiet presence

Regrowth

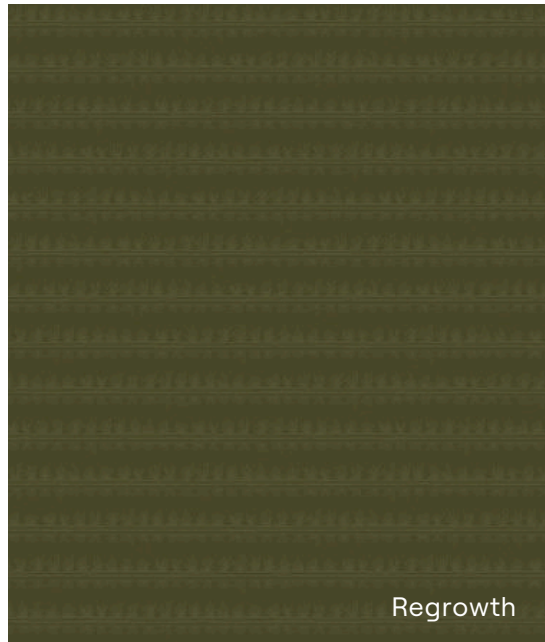

A study of renewal, where the top layer represents visible new growth and ecological change, and the root system below symbolises the foundations, soil health, biodiversity, heritage, memory, and ancestral knowledge that sustain each cycle of regeneration.

Seasonal Winds

Taking inspiration from how wind carves through land, bending trees, shaping dunes, and etching curves into the earth. Capturing both the passage of time and the resilience of landscapes constantly being reshaped through seasons.

SHIFTING LANDSCAPES COLLECTION

THE SPECIFICATION OPPORTUNITY

Material as a Medium: This range serves as an invitation for the architecture and design community to engage with First Nations storytelling through the act of material specification.

Made-to-Order Integrity: These patterns are not an "off-the-shelf" range; they are made-to-order architectural solutions. This approach ensures that every application is intentional and that the cultural story is faithfully represented in every unique project environment.

Seamless Integration: The First Nations range is meticulously designed to match the existing DuraCube stock range. This alignment allows specifiers to easily incorporate these deep cultural narratives into their daily professional workflow without compromising on technical requirements.
