Our Sports & Recreation Range

THE SECTOR

Sporting facilities are among the most demanding spaces to build.

They carry relentless use, constant moisture and diverse users — from community clubrooms to aquatic centres and elite sporting venues. Four factors decide whether they hold up. This book sets out those four factors, then shows how they were answered on four Australian projects — a regional football club, a council redevelopment, a new public parkland and a suburban baseball ground. Every system named here is manufactured in Australia and covered by a 15-year warranty on both product and installation.

WHAT A SPORTS & RECREATION PROJECT DEMANDS

FOUR FACTORS THAT DETERMINE WHETHER YOUR FACILITY HOLDS UP

Relentless use. Regular moisture. Diverse users. Every specification decision in a change room answers to all of these challenges.

01

Built for constant, high-contact use

Materials must resist heavy traffic, impact and moisture, while layouts for lockers, seating and change rooms stay practical and user-friendly under everyday pressure.

02

Wet area hygiene and safety

High-traffic, high-moisture environments demand non-porous, water-resistant, easy-to-clean surfaces that prevent bacteria, mould and cross-contamination.

03

Inclusive and gender-equitable design

Thoughtful finishes, colours and layouts create environments that reflect local identity, support gender equity and ensure universal access — so every player, official and spectator is catered for.

04

Sustainability and whole-of-life value

Products with extended lifecycles reduce maintenance, minimise waste and align with council environmental targets — so the community benefits for years, not seasons.

Case Study

Browne Park Stadium
QUEENSLAND

"Bringing people together and supporting sport and major events in Rockhampton."

Paul Hoolihan
Chairman,
Browne Park Inc

With more than 130 years of rugby league history behind it, Browne Park is a cornerstone of the Rockhampton community. The redevelopment replaces the former Jack Crow Stand with a new three-level single-tier western grandstand under roof cover, and sets the foundation for a master plan that will take the venue to 10,000 spectators for sport and 18,000 for concerts and major events.

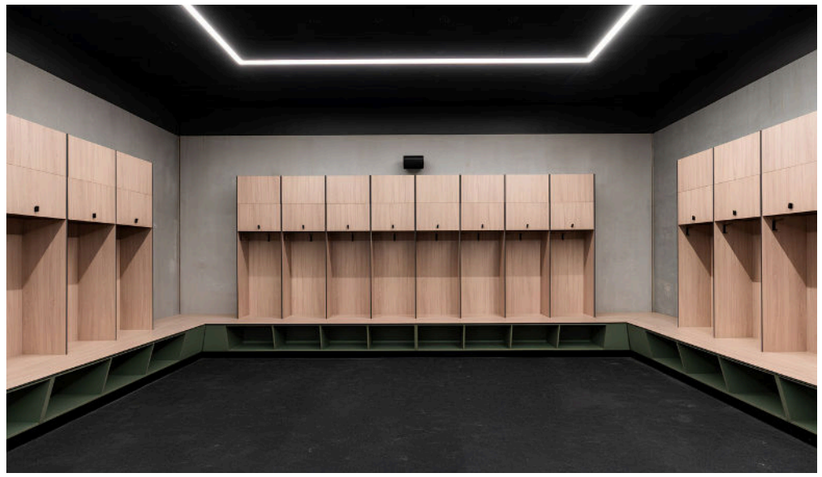

The ground level carries four universally designed change rooms, new amenities and support spaces. Above them sit function rooms, corporate suites and broadcast facilities. DuraCube supplied Floor Mount Ceiling Fixed partitioning, plinth mounted lockers and custom player locker units throughout the change rooms.

DuraCube supplied the bathroom joinery across all four change rooms, manufactured from DuraSafe 13mm compact laminate — a material that resists moisture through its full thickness rather than relying on a sealed surface, and that takes impact without the need to replace edge tape as the edges are a sophisticated visible black core.

Manufacturing at a capacity of around 1,000 cubicles per week, DuraCube's market leading capacity what makes a package of this size a scheduling non-event rather than a risk the builder has to manage.

Case Study

Weston Bears Park
NEW SOUTH WALES

"Our goal was to create a facility that is accessible to everyone."

Rob Henderson
President,
Weston Bears Football Club

Home to a football club with roots dating back to 1907, the park hosts Premier League matches, training, and community programs. Cessnock City Council's multi-million-dollar redevelopment — guided by a masterplan adopted in 2020 — rebuilt the grandstand as a clubroom and added new team change rooms, referee facilities and a gym.

DuraCube supplied and installed Floor Mount Ceiling Fixed partitions throughout the change room and amenity areas, with ambulant cubicles, compact laminate shower seats, custom vanity benches and the new player locker system. The upgrade delivered the club's first dedicated female amenities.

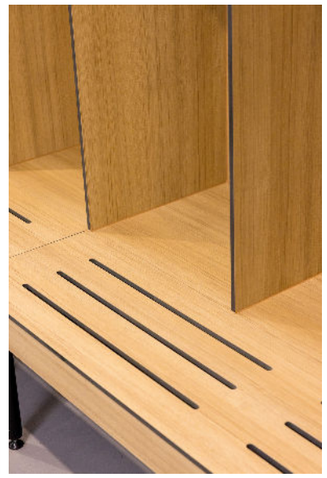

Before the redevelopment, the club had no dedicated female amenities. Individual cubicles were added across both home and away change rooms, with ambulant fixtures, Viva black hardware and vacant/engaged indicators throughout.

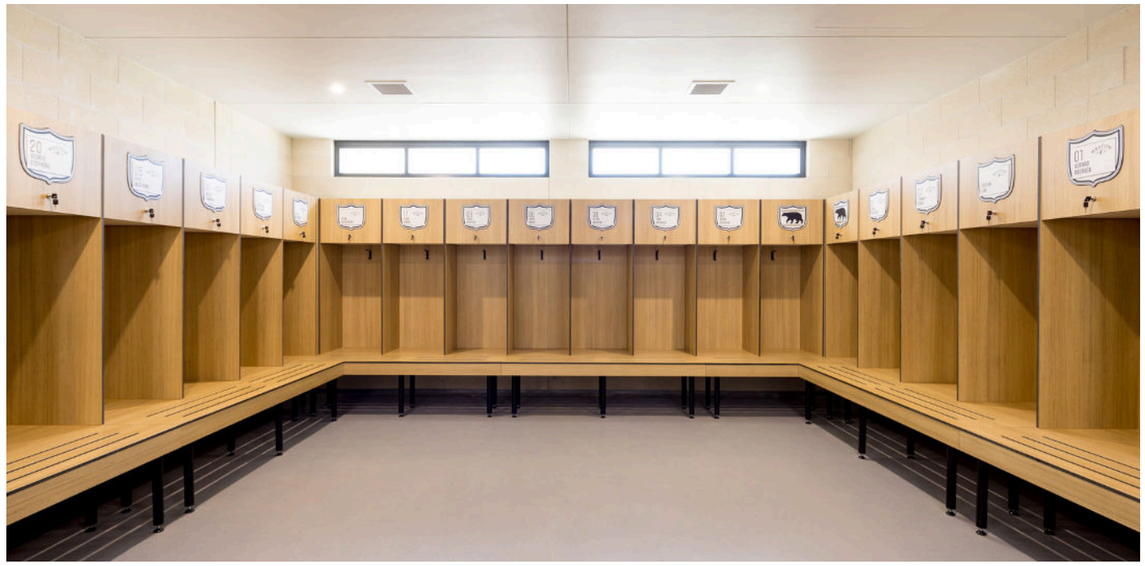

Customisable door and locker faces let the club's heritage carry through the finish rather than sit on top of it — no printed graphics, no applied signage, just the board itself.

- DuraSafe 5003 Philippine Teak compact laminate

Case Study

Adelaide Aquatic Centre
SOUTH AUSTRALIA

"By using standard materials in creative ways and prioritising quality over complexity, we have achieved durable, efficient, and cost effective solutions that also support an environmentally regenerative design response.''

Daryl Maguire
Principal
Warren and Mahoney

One of South Australia's most significant community recreation investments, sitting within Pardipardinyilla / Denise Norton Park in Adelaide's northern Park Lands. Funded and delivered by the State Government and operated by YMCA Aquatic, it replaces the original centre with a 50-metre indoor competition pool, a 25-metre outdoor pool, learn-to-swim and warm water rehabilitation pools, wellness facilities and expanded gym spaces.

DuraCube supplied and installed Floor Mount Ceiling Fixed partitioning throughout the change rooms and amenities, engineered for structural continuity and the streamlined appearance a premier public venue demands.

A major public aquatic facility needing amenity systems that hold durability and appearance under permanent moisture exposure — while meeting accessibility requirements for people of all ages and abilities, and matching the contemporary architectural vision of the new centre.

A strategic mix of standard and ambulant cubicles in both inward and outward swinging configurations, with a full suite of Satin Chrome Viva hardware — lift-off hinges, coat hooks, door bumpers, vacant/engaged indicators and compliant D-handles — and matching shower seats in the same board.

Case Study

Diggers Rest Football Netball Club
VICTORIA

"DuraCube's systems aligned with the project's functoinal and aethetic goals - particularly around accessibility and durability for a high-traffic community facility. DuraCube also provided a comprehensive set of shop drawings for review, ensuring sizing or compliance issues were identified early, and installation on site proceeded without complication."

Kristina Theodossiou
Marketing Coordinator,
K20 Architecture

In 2024, the Diggers Rest Football Netball Club celebrated the transformation of its community sporting precinct. At the heart of this redevelopment was the unveiling of a new 550 sqm pavilion—The Shelter. Designed to echo the area's rich history, the facility offers a place for rest, gathering, and community spirit.

Commissioned by Melton City Council, the project aimed to deliver a state-of-the-art, gender-equitable, and accessible facility.

Designed by K20 Architecture, the redevelopment also included the realignment of the sports oval and the construction of a contemporary pavilion catering to netball, tennis, and football.

Environmental sustainability was embedded throughout K20 Architecture's design concept, including the use of recycled materials, solar panels, natural ventilation, and low-VOC finishes.

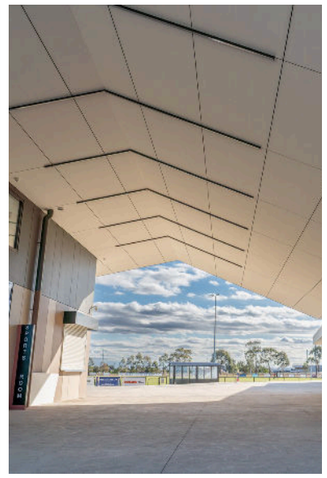

To meet the project's requirements for durability, accessibility, and aesthetic cohesion, K20 Architecture selected DuraCube systems for the pavilion's bathroom and changeroom facilities. DuraCube's systems were chosen for their proven strength in high-use wet areas and their ability to seamlessly integrate with the project's architectural vision.

The result is a facility that performs under pressure, presents a modern aesthetic, and supports long-term sustainability goals.

Our Products
- Pedestal Mount Overhead Braced (POB)
- DuraSafe 268 Evening compact laminate

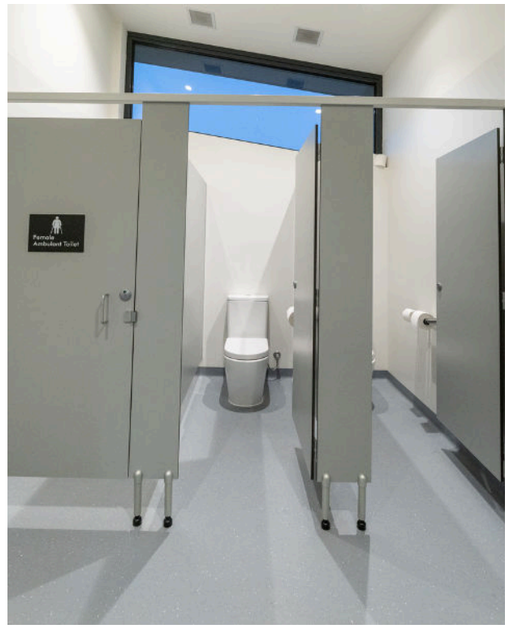

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

FLOOR MOUNT OVERHEAD BRACED (FOB)

Fixed to the floor with an overhead aluminium bracing rail for load distribution and impact resistance. Built for club toilets and showers that take hose-down cleaning and rough daily use.

HOW TO SPECIFY
Product: DuraCube door mount, overhead braced (FOB)
Door and Panel Construction Material: DuraSafe 13mm compact laminate. Viva satin chrome hardware is standard. Other hardware is available
Headrail Aluminium square pro le 40mm x 40mm Colour – Oyster Grey powder coat
Floor Mounting Nib panels fixed with 40mm x 12mm powder-coated aluminium at bar or optional skirt mount
Overall System Height 2020mm AFFL

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

FULL HEIGHT – PRIVACY CORE (FHPC)

Floor-to-ceiling, zero-sightline privacy for referee rooms and premium upgrades — while maintaining standard airflow, so it does not trigger additional mechanical ventilation under the NCC.

HOW TO SPECIFY
Product: DuraCube full-height privacy core (FHPC)
Door and Panel Construction Material: DuraSafe 13mm compact laminate. Viva satin chrome Door and Panel Construction Material: DuraSafe 13mm compact laminate
Hardware: Viva satin chrome hardware is standard. Other hardware is available
Ceiling Fixing Aluminium channel Colour – options available
Floor Mounting Aluminium angle Colour – options available
Overall System Height Min. 2340mm to Max. 3000mm AFFL

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

LOCKERS – PLINTH MOUNTED (LPM)

Fixed to the floor via a plinth which keeps the locker carcass and internal contents safe from moisture build up and general cleaning. These lockers are available in 1-door, 2-door, 3-door, 4-door, and L-door formats.

HOW TO SPECIFY
Product: DuraCube locker systems – plinth-mounted (LPM)
Door and Panel Construction Material: DuraSafe 13mm compact laminate
Internal Carcass Construction Material: Select either: Dry area lockers – white or black 16mm HMR board Wet area lockers – white 16mm PVC board
Lock: Select lock from either: • Electronic Touch Pad Lock (ETP) • Electronic Button Lock (KL1000) • Mechanical Combination Lock (KL20) • Padlock Hasp (PH) • Standard Key Lock (KL)

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

PLAYER LOCKERS (LBSM-P, LSBSM-P AND LBSM-C)

Storage and seating in a single unit, with under-bench shoe storage on the LSBSM-P and a cricket variant built to Cricket Australia guidelines. Player lockers can be coordinated to match the partitioning colour scheme, or the club colours of the local sporting team.

HOW TO SPECIFY
Product: DuraCube locker systems – bench seat mount player (LBSM-P), shoe box seat mount player (LSBSM-P) or bench seat mount cricket (LBSM-C)
Door and Panel Construction Material: DuraSafe 13mm compact laminate
Internal Carcass Construction Material: Select either: Dry area lockers – white or black 16mm HMR board Wet area lockers – white 16mm PVC board
Lock: Select lock from either: • Electronic Touch Pad Lock (ETP) • Electronic Button Lock (KL1000) • Mechanical Combination Lock (KL20) • Padlock Hasp (PH) • Standard Key Lock (KL)

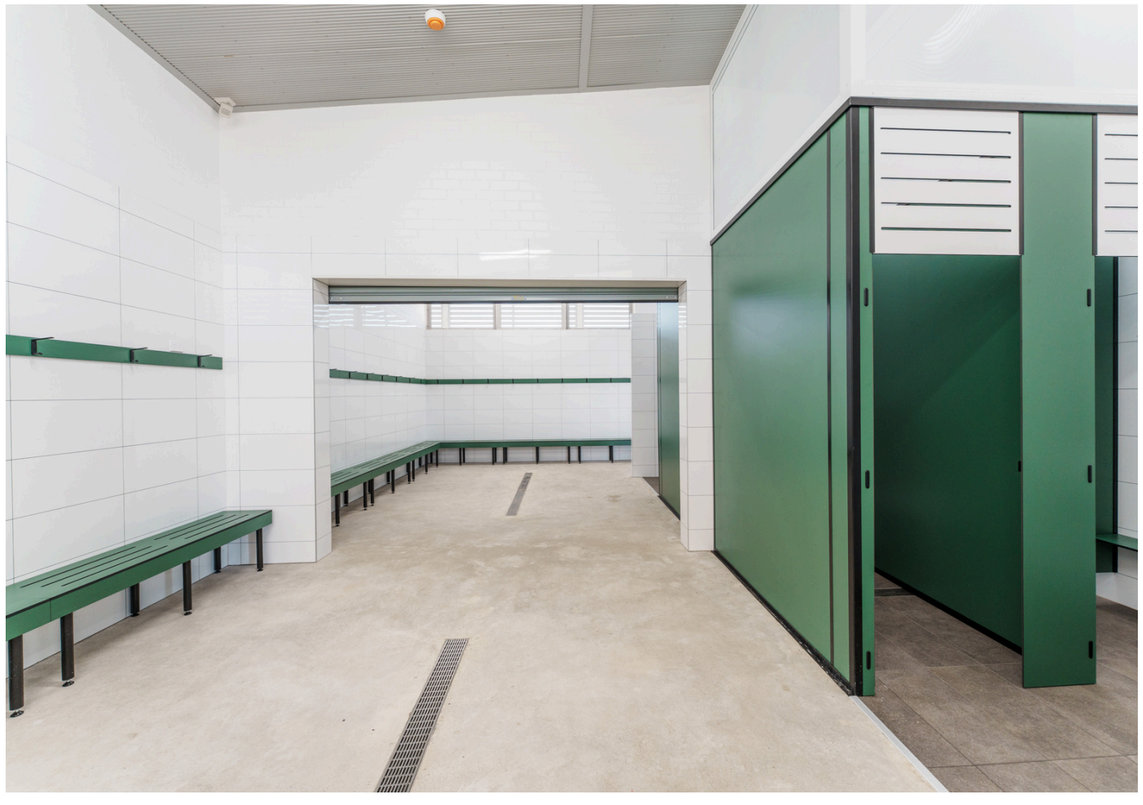

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

BENCH SEATING – WALL WITH COAT RAIL (BSW-C)

Heavy-duty laminate slats with an integrated coat rail and anti-snag hooks. Seating and gear hanging in one streamlined footprint, keeping kit off wet floors. A low maintenance alternative to timber seating and an attractive alternative to aluminium seating.

HOW TO SPECIFY
Product: Bench seating – wall with coat rail (BSW-C)
Bench Seat Construction Material: DuraSafe 13mm compact laminate
Coat Rail: DuraSafe 13mm compact laminate
Bench Seat Legs: Aluminium leg – Pearl Grey or black powder coat

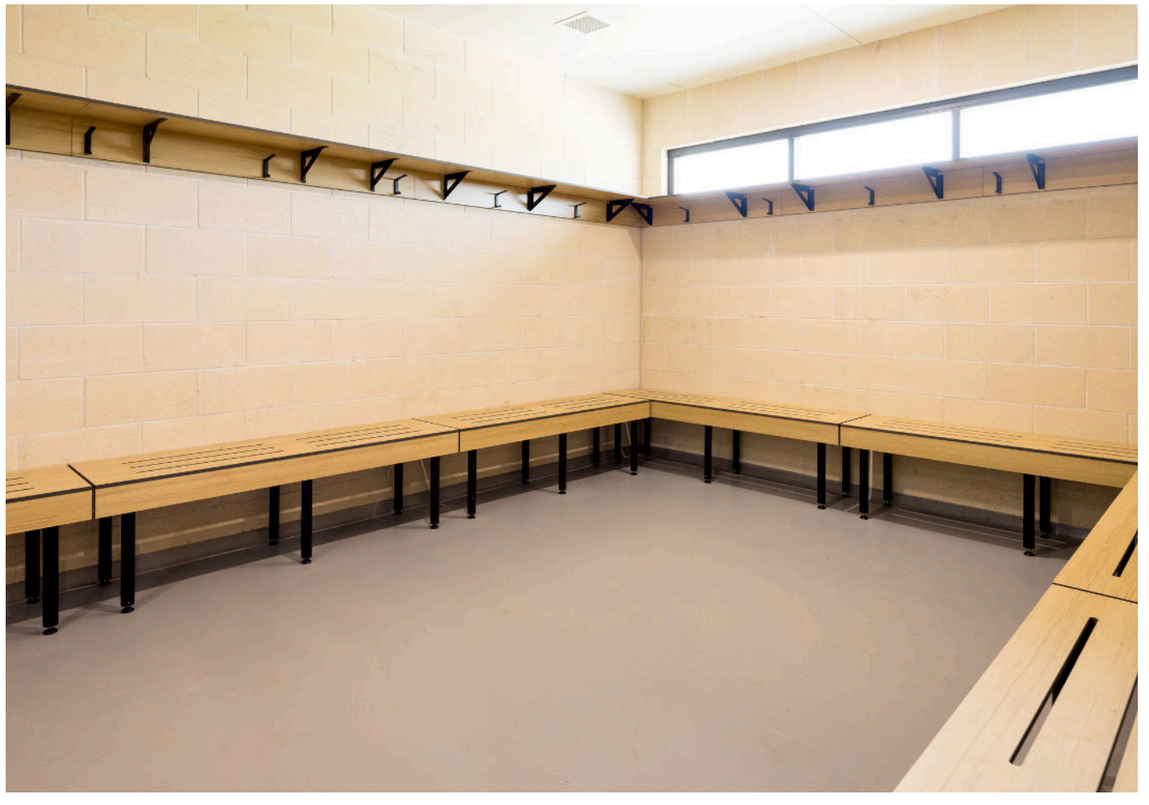

SYSTEMS SPECIFIED FOR SPORTS & REC

Every system below is built from 13mm DuraSafe compact laminate and available as one package — one point of contact, one lead time, one consistent finish across the whole facility.

BENCH SEATING – WALL WITH SHELVING (BSW-S)

Bench seating paired with overhead shelving, so players have somewhere to sit and somewhere overhead to stow sporting gear. Easier rooms to clean and safer rooms to move through. A low maintenance alternative to timber seating and an attractive alternative to aluminium seating.

HOW TO SPECIFY
Product: DuraCube bench seating – wall with shelving (BSW-S)
Bench Seat Construction Material: DuraSafe 13mm compact laminate Bench Seat Construction Material DuraSafe 13mm compact laminate Shelving Construction Material: DuraSafe 13mm compact laminate
Shelf Bracket – Oyster Grey powder coat
Bench Seat Legs: Aluminium leg – Pearl Grey or black powder coat

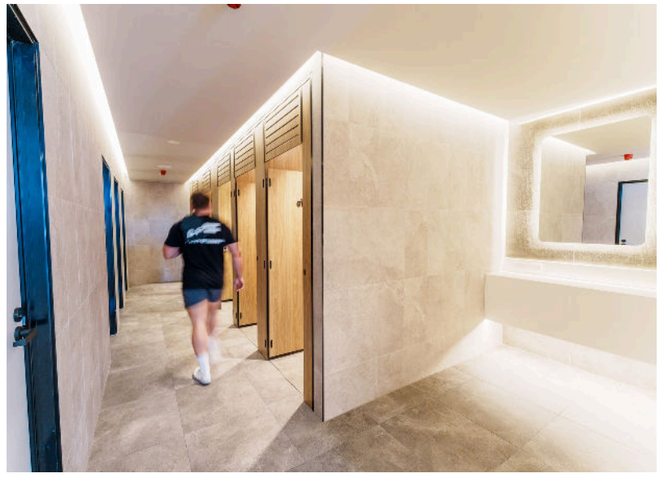

Built for Sport
ENGINEERED FOR LONG-TERM PERFORMANCE

From community clubs and gyms to aquatic centres, elite training facilities and school sports complexes, DuraCube systems are manufactured in Australia and tested to withstand high traffic, constant moisture and rough daily use — then backed by a 15-year warranty covering both the product and the installation.

Pre-filled FF&E schedules carry product codes, board selections and mounting details — a single system, or an entire clubroom or aquatic change room in one master document.
